COR CERTIFICATION

to Be Produced before the Award

PROOF OF INSURANCE

to Be Produced before the Award

The NLSCA administers the COR program to help ensure OHS standardization for the province's construction companies. Until recently there have been three categories within the NLCSA's COR program. A company could have received a Letter of Good Standing stating *In Process*, *Audit Pending*, or *Certificate of Recognition*.

Tenders for contracts that would typically have a COR requirement must use the following language:

The Contractor shall within 14 days of award of the contract, and prior to commencement of the work, provide a Letter of Good Standing stating Certificate of Recognition (COR) certified from the Newfoundland and Labrador Construction Safety Association (NLCSA)."

Instruction to Bidders
